

## SugarExchange Data Sheet (Providers)

### The Sugar Online Marketplace

SugarExchange is the online marketplace featuring hundreds of Sugar extensions provided by the Sugar developer community. Just a few clicks allows Sugar administrators and users to browse and download extensions for immediate use.

Think of SugarExchange as a storefront for items you make in SugarForge. When your SugarForge project is stable and mature, you publish items for download or for sale in SugarExchange for maximum exposure.

Modeled after popular sites like download.com but tailored for the Sugar users and implementers, SugarExchange is the one-stop Sugar shop for the entire Sugar installed base.

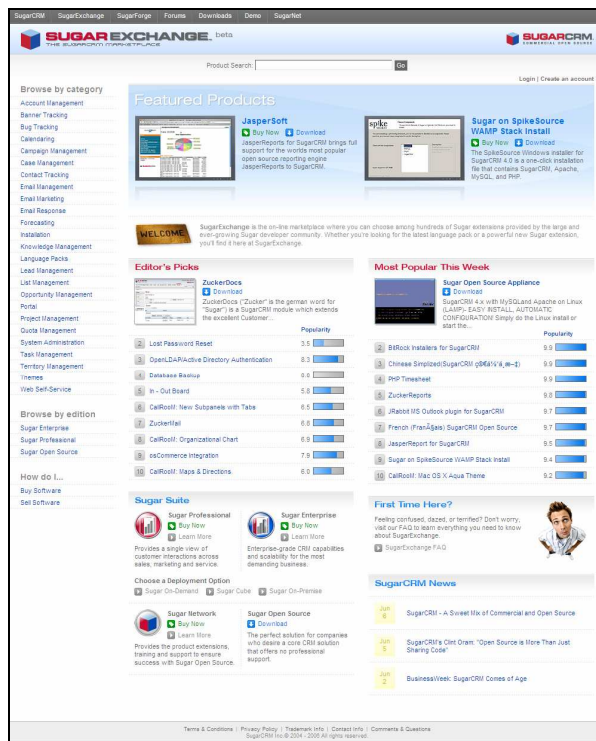

### Secure and Trustworthy

SugarExchange provides a safe and secure online shopping experience. Paid transactions are managed by secure PayPal® services. SugarExchange merely facilitates the transaction that ultimately occurs between you, the SugarExchange provider, and your customer.

The trustworthiness of your published content is assured by stringent listing requirements you must meet. Of course, in keeping with our open source lineage, SugarExchange providers sink or swim based on their reputations. SugarExchange popularity and user ratings are provided expressly for this purpose.

### Enamored with SugarForge?

The introduction of SugarExchange allows for a sharper focus between the Sugar developer and installed customer base audience. You can continue to provide downloads on SugarForge but if you want to turbocharge your downloads or if you want to offer items for sale, you'll want to set up shop in SugarExchange.

### Availability

SugarExchange is available for use immediately.
